PRO NATURE BIOME

Starter Pack Documentation & Upgrade Guide

Thank You for Downloading!

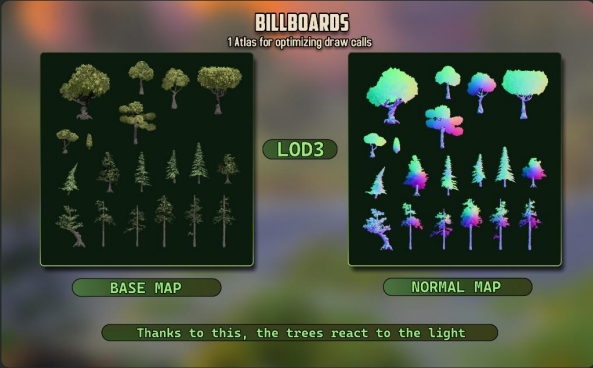

I hope you enjoy using the *Pro Nature Biome: Starter Pack*. This free version was designed to give you a taste of the visual fidelity and optimized geometry included in my full ecosystem.

If you are building a commercial game and need massive variety, extreme performance, and out-of-the-box VFX, read on to discover what my full package has to offer.

Starter Pack vs Full Version

Feature	Starter Pack (Free)	Pro Forest Pack (Full)
Total Game-Ready Prefabs	5 Basic Assets	80+ Unique Assets
Advanced Wind Shader	None	Full Vertex Color & Height Normalized Sway
LODs & Billboards	Standard LODs (No Billboards)	Perfect Handcrafted LODs & Impostor Billboards
VFX Graph Integrations	None	Swarm VFX (Butterflies) via Visual Graph for optimized FPS
Texture Maps & Workflows	Base Color Only	Handpainted Texture Paint, Baked AO & Base Color Maps

Why Upgrade to Pro?

Engineered for Performance

Every tree, bush, and grass mesh is deeply optimized. I utilize strict polygon budgets and seamless LOD transitions ending in hyper-optimized Billboard textures for massive dense forests at 60+ FPS.

Extensive Variety

Build completely unique biomes without repetitive tiling. Over 80 modular prefabs including ancient pines, twisted oaks, ground foliage, and organic debris.

Living Environments (VFX)

Bring your scenes to life instantly. Spawn thousands of glowing butterflies with exposed parameters—zero coding required, built strictly on the Visual Graph to optimize your game's FPS.

Stylized Shading & Baked AO

My materials rely on clean Base Colors, precise Texture Painting, and custom-baked Ambient Occlusion. Combined with the Vertex Color wind shader, the vegetation responds beautifully to environment light while keeping the roots perfectly grounded.

Ready to build your ultimate forest?

Get the Pro Nature Biome Pack now on the Unity Asset Store.

Upgrade to the Full Version

Includes lifetime updates and premium support!
